PROFILE

An experienced Full Stack Developer with comprehensive expertise in end-to-end application development using various modern technologies. Proven track record in implementing effective and scalable technological solutions, though some projects remain confidential due to agreements. Known as a quick learner with high adaptability to new technologies. Communicative and actively collaborates in development teams, with a strong passion for exploring innovations in IT. Solution-oriented with strong motivation for self-development and contributing to creating positive impact through technology. Demonstrates exceptional problem-solving abilities while maintaining a keen interest in staying current with emerging tech trends and best practices.

SKILLS

React Native / Svelte Js	Express Js	Sequelize / Native
React Js / Next Js	HTML & CSS	Tailwind
Vue Js / Nuxt Js	SQL / PostgreSQL	SCRUM

PROFESSIONAL EXPERIENCE

ASIATECH INTIRAYA   **February 2023 - July 2023**
Backend Developer
Developed a web-based school management system with features for student and teacher data management, class schedules, attendance tracking, and more. Integrated an e-learning system for seamless interaction with the school management system. Implemented an internal messaging system for secure communication among students, parents, teachers, and staff. Created an integrated evaluation and academic reporting system for assessments and grade tracking. Added features for managing extracurricular activities and school events. Facilitated assignment management and online submission for digital academic task handling.

VALDO SUMBER DAYA MANDIRI   **August 2023 - Present**
Fullstack Developer
Designed and developed an application system comprehensively, including creating an intuitive and responsive user interface (frontend), developing the backend for optimal performance and data security, and configuring the server to support the application. Responsibilities also included seamless integration between frontend and backend, maintaining the server to ensure high uptime and stable performance, efficiently identifying and resolving bugs and issues, performing regular system updates, and innovating by creating an internal chat bot to efficiently monitor the system and handle issues.

JOY CYBER - POLARIS ALKES STARINDO   **March 2024 - November 2024**
Frontend Developer (Freelance)
I am responsible for developing and maintaining web applications using Next.js, focusing on fast, responsive, and SEO-friendly solutions. I leverage SSR and SSG to optimize performance and user experience, while collaborating with backend teams and APIs for efficient data integration. Additionally, I prioritize speed and performance optimization, utilizing asset management techniques and performance testing. I work within cross-functional teams, follow Agile methodologies, and use Git for version control to ensure timely and high-quality project delivery.

FAZZTRACK   **November 2024 - Present**
Mentor (Freelance)
As a Technical Mentor at a bootcamp, I played a pivotal role in assessing and developing aspiring developers. My responsibilities included conducting thorough technical interviews to evaluate candidates' skills and potential, providing detailed assessments and summaries for admission decisions. I actively reviewed bootcamp talents' assignments, offering constructive feedback to enhance their coding practices and implementation of industry standards. Additionally, I provided dedicated 1-on-1 mentoring sessions for participants facing learning challenges, delivering supplementary materials and detailed explanations to ensure their complete understanding of complex programming concepts. This hands-on approach helped bridge knowledge gaps and enabled participants to successfully grasp the bootcamp curriculum.

EDUCATION

UNIVERSITY ESA UNGGUL   **STATE HIGH SCHOOL 1 BELITANG**
Informatics Engineering   Social Science
September 2023 - Present   June 2019 - May 2022
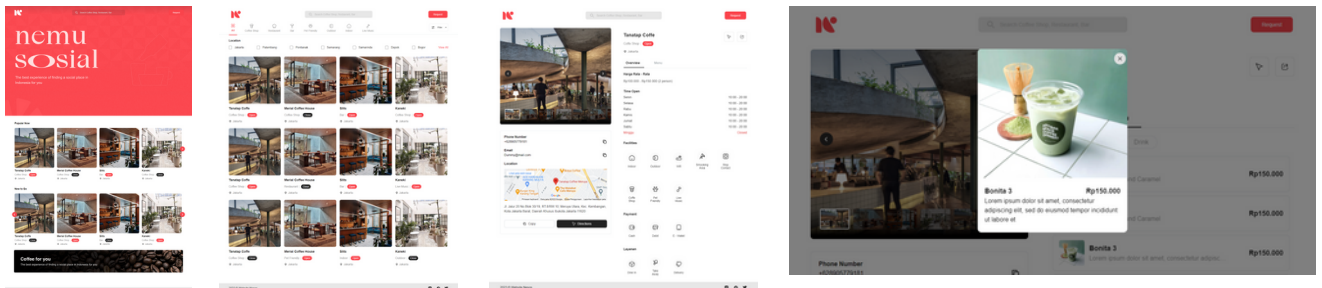

FAZZTRACK
Fullstack Web Developer
September 2022 - December 2022

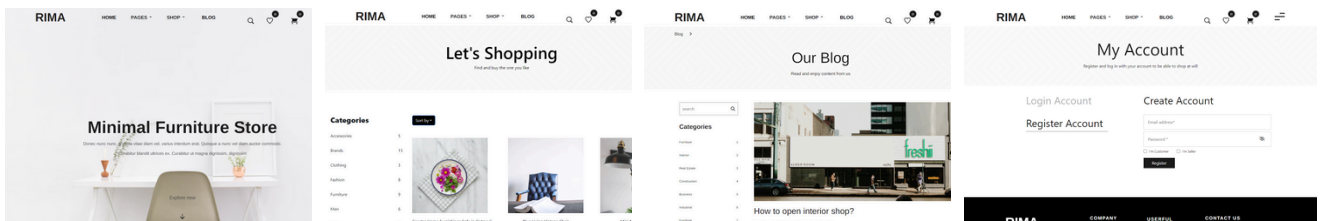

PORTFOLIO

NESOS

Nesos is a website for reservation and booking of tables at restaurants, bars, and similar establishments across Indonesia, built using React.js. This project focuses solely on designing the frontend interface without having a backend implementation.

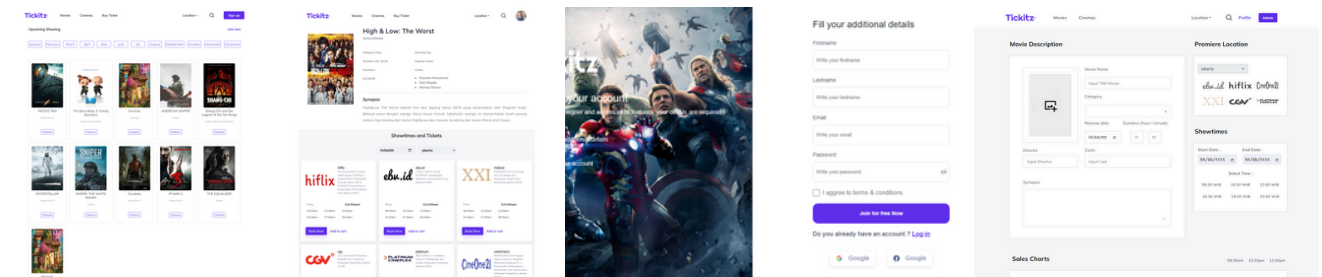

RIMA - FURNITURE

My first collaboration project to build a web-based marketplace site. As a fullstack I was assigned to complete full features for the backend such as auth, crud, middleware, etc. While for the frontend, I completed the create product, forgot-pwd,etc.
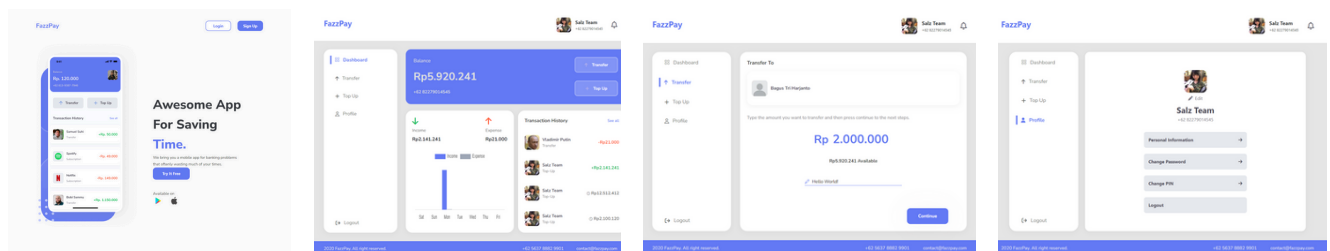

XAZAM - TIKETZ MOVIE

My second collaboration project to build an online movie ticket booking website. As a fullstack I was assigned to complete full features for the backend such as auth, crud, middleware, etc. while for the frontend, I completed the create movie section.

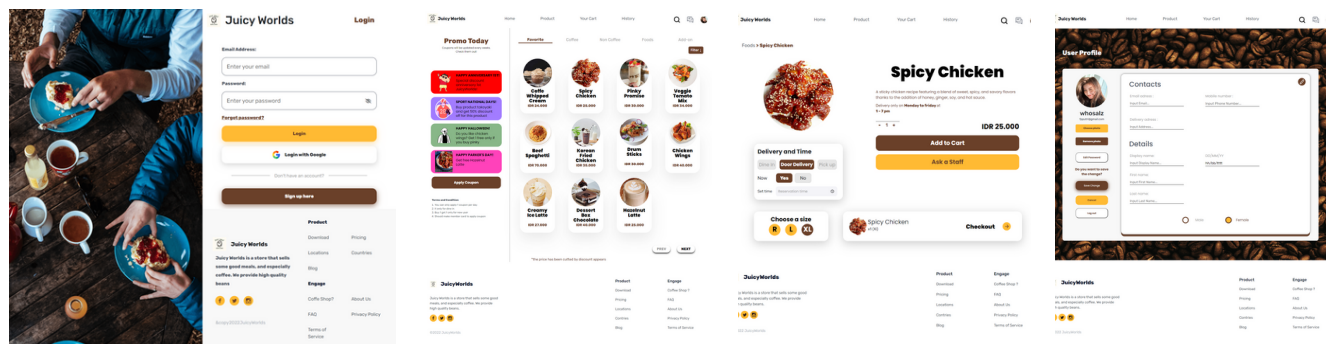

FAZZPAY

Fazzpay is a simple E-wallet based on a website built using Next Js.

JUICYWORLD WEBSITE

In this project, I created a website-based JuicyWorld using React Js where customers can order food or drinks online and practically without leaving the house. Customers can also order to eat in or take away.

JUICYWORLD MOBILE-APP

In this project, I created a mobile application using React Native where customers can order food or drinks online and practically without leaving the house. Customers can also book orders to eat on the spot or take away.
